

HEADS UP TO ALL "SCIENCE-MINDED" PARENTS, BUSINESS OWNERS and EMPLOYEES, RELATIVES and FRIENDS

HAVE YOU EVER BEEN ON THE HORNS OF A DILEMMA WONDERING....

- what type of food molds the fastest?
- how effective are child-proof containers and locks?
 - does shoe design affect jumping height?
 - does the room color affect human behavior?
- can kids concentrate better (or worse) with the TV on?

These answers and many more will be available to you, along with the young scientists (grades K-5th) who researched these mysteries, and have *proven data* to back up their results, and need the listening ears of visiting scientists, like you, to hear their exciting experiments, methods and conclusions explained!

at the
PINEY RIDGE SCIENCE FAIR

Friday, November 6th, 2009
@ PINEY RIDGE ELEMENTARY SCHOOL

Anyone interested in being a visiting scientist, even for an hour, should fill out the bottom portion of this slip or and return to Piney Ridge School, **attn. Science Fair Committee** or send an email it to jeremycooper2009@hotmail.com

Remember, these children are our future, and it only takes one inquisitive and supportive adult to inspire that passion!

____ Yes, I would like to be a "visiting scientist" at the Piney Ridge Science Fair!
